

NEGATIVE SCANNING

Negative Scanning (Black and White or Color):

Negatives are some of the most precious photographic memories you have. They're much more precious than prints. Negatives will usually produce much better scans with greater detail and less color shift

Negatives require extremely gentle handling. Something as simple as identifying the right side to scan (i.e., the emulsion side) takes a trained eye.

At Quality Plus Photo Design Center you can rest assured that every negative is treated with the utmost care, from pre-scanning preparation to final scanning.

- Up to 8.5 x 11\$1.15
- Uncut rolls of film(up to 36 exposures).....\$ 3.00 per roll
