

SLIDE SCANNING

35mm slideshows were one of the most popular ways to enjoy pictures in the 60's and 70's with your family and friends.

Today we need to digitize your slides to enjoy viewing them. Projectors and bulbs are not as easily accessible to maintain and purchase.

35mm, 110, & 126 Cardboard or plastic mounted slides are scanned using the latest technology and saved at 300dpi for the best reproduction possible.

If your slides are submitted in particular order, rest assured your organization will remain intact.
